

Release Plan - CSE 115A - Software Methodology

SlugShare

Jasdeep Matharu, Samarth Shastry, Nithin Danday, Jordyn Salazar, Hannah Dinh

Completed: January 20th, 2026 | Revision v1.0

- **High level goals:**
 - Build a web app that connects UCSC students in need of food to those that have extra points to spend.
 - Be able to sign up as a user and have settings and requests be persistent across sessions.
 - Provide a dashboard so users can make and receive requests.
 - Have access to point spending tools so users can have an estimate of how much they can spend on others and themselves.
- **The complete list of user stories**
 - **Sprint 1**
 - As a *user*, I want a dashboard where I can see my points balance, a button to view other people's requests, a button to make requests (8pts)
 - As a *user*, I want to view my profile information and edit my phone number, which can be shared with the donor/requester for communication purposes. (3pts)
 - As a *requester*, I want to be able to remove/delete my requests before they get accepted (3pts)
 - As a *user*, I want to sign up and log in so I can securely access the application (5pts)
 - **Sprint 2**
 - As a *requester*, I want to see food locations and their prices and hours of operation. (1pt)
 - As a *donor*, I want to receive notifications for new requests so that I can accept or decline them. (5pts)
 - As a *donor*, I would like to be able to generate a QR code linked to my Slugpoints to share with *requesters* (8pts)
 - As a *requester*, I want to indicate whether I'm okay meeting in person or receiving a QR code (3tps)
 - As a *donor/requester*, I want a tool that lets me filter out existing/queued requests based on distance, their chosen dining hall/market/restaurant location, the amount of points being requested, and whether the requestor would be okay with meeting irl. (5 points)
 - **Sprint 3**

- As a user, I would like to see a list of food pantries on campus, their locations, and their hours of operation. (3pts)
- As a *donor*, I want a tool that projects my points spending for the rest of the quarter and see how many points I have leftover to share. (5pts)
- As a *donor* I would like for the dashboard to have an accurate up to date showing of how many points my account has (3pts)
- As a requestor, I want to edit my already posted requests before it gets accepted (1 point)
- As a *requester*, I want to be able to see the GET QR code after having a request accepted (5 points)

○ **Sprint 4**

- As a *user*, I want to be able to view a mobile specific version of the web application (5pts)
- As a donor, I would like my QR code to have a spending limit, time limit, and for the ability to be pulled (5 points)
- As a *user* I want push notifications and gmail notifications for requests accepts (5pts)
- As an *admin*, I want to view all requests to monitor system usage. (8pts)
- As a user, I want to be able to view a dark mode version of the web app (1 point)

● **Sanity Check your release plan**

There are a total of 78 story points split across the 4 sprints, so about 20 story points for each sprint or 4 story points per person per sprint. We believe that given the skillset of all of us combined, this is within our team's capacity. The work distributed does not take into account midterms and holidays, but it does take into account us falling behind. In case that does happen, sprint 4, despite having 20 story points, has a few user stories that can be done quickly. If help is needed with the other users stories, there is likely to be someone done that can assist.

● **Product backlog:**

- As an admin I want the ability to disable accounts.

● **Initial Presentation:** CSE 115A SlugShare Initial Presentation.pptx
