

Acceptance Criteria - CSE 115A - Software Methodology

SlugShare

Jasdeep Matharu, Samarth Shastry, Nithin Danday, Jordyn Salazar, Hannah Dinh

Completed: Jan 20th, 2026

- **The complete list of user stories**

- Sprint 1

- As a *user*, I want a dashboard where I can see my points balance, a button to view other people's requests, a button to make requests (8pts)

- Acceptance Criteria

- The dashboard can display a point balance.
 - The dashboard contains a button that navigates to the request list page.
 - The dashboard contains a button that allows the user to create a new request.
 - The dashboard loads automatically after the user logs in.

- As a *user*, I want to view my profile information and edit my phone number, which can be shared with the donor/requester for communication purposes. (3pts)

- Acceptance Criteria

- Users can view their profile information on a profile page.
 - The profile page displays the user's phone number.
 - Users can edit and save a new phone number.
 - The updated phone number is stored and displayed correctly after saving.

- As a *requester*, I want to be able to remove/delete my requests before they get accepted (3pts)

- Acceptance Criteria

- Each request has a delete/remove button.
 - If the request has not been accepted, the requester can delete it.
 - Once deleted, the request is removed from the system and no longer visible to donors.

- As a *user*, I want to sign up and log in so I can securely access the application (5pts)

- Acceptance Criteria

- New users can create an account using the signup page.
 - Users can log in with a valid username/email and password.

- The system shows an error message if login credentials are incorrect.
 - After logging in successfully, users are redirected to the dashboard.
- Sprint 2
 - As a *requester*, I want to see food locations and their prices and hours of operation. (1pt)
 - Acceptance Criteria
 - The system displays a list of campus dining locations.
 - Each location shows its hours of operation.
 - Each location shows food prices or price ranges.
 - As a *donor*, I want to receive notifications for new requests so that I can accept or decline them. (5pts)
 - Acceptance Criteria
 - Donors receive a notification when a new request is posted.
 - Notifications include basic request details (location, points requested).
 - As a *donor*, I would like to be able to generate a QR code linked to my Slugpoints to share with *requesters* (8pts)
 - Acceptance Criteria
 - Generated QR code
 - The QR code is unique to the donation.
 - Requesters can scan the QR code to spend points.
 - The QR code is only accessible after a request has been accepted.
 - As a requester, I want to indicate whether I'm okay meeting in person or receiving a QR code (3tps)
 - Acceptance Criteria
 - When creating a request, users can choose "In Person", "QR Code", or both.
 - The selected option is visible to donors viewing the request.
 - The system stores the requester's preference with the request.
 - As a donor/requester, I want a tool that lets me filter out existing/queued requests based on distance, their chosen dining hall/market/restaurant location, the amount of points being requested, and whether the requestor

would be okay with meeting irl. (5 points)

- Acceptance Criteria
 - Users can filter requests by dining location.
 - Users can filter by the number of points requested.
 - Users can filter by meeting type (in-person or QR code).
 - The filtered list updates to show only matching requests.

○ Sprint 3

- As a user, I would like to see a list of food pantries on campus, their locations, and their hours of operation. (3pts)

- Acceptance Criteria
 - The system displays a list of campus food pantries.
 - Each pantry shows its location.
 - Each pantry shows its hours of operation.
 - Links to the services website are given

- As a *donor*, I want a tool that projects my points spending for the rest of the quarter and see how many points I have leftover to share. (5pts)

- Acceptance Criteria
 - Donors can view a projection of remaining SlugPoints, shown as a graph
 - The projection takes into account users average spendings
 - The system displays the estimated number of points available to share.

- As a *donor* I would like for the dashboard to have an accurate up to date showing of how many points my account has (3pts)

- Acceptance Criteria
 - The dashboard displays the current SlugPoints balance.
 - The balance updates after donations or spending.
 - The displayed balance matches the system's stored value.

- As a requestor, I want to edit my already posted requests before it gets accepted (1 point)

- Acceptance Criteria
 - Each request includes an edit option.
 - The request can only be edited before it is accepted.
 - After editing, the updated request is visible to donors.
 - Edit options include a available options the user is given when they created the request

- As a *requester*, I want to be able to see the GET QR code after having a request accepted (5 points)
 - Acceptance Criteria
 - Once a donor accepts a request, the requester can access the QR code.
 - The QR code is displayed on the request details page.
 - The QR code can be scanned to complete the transaction.
- Sprint 4
 - As a *user*, I want to be able to view a mobile specific version of the web application (5pts)
 - Acceptance Criteria
 - The website layout adjusts to mobile screen sizes.
 - All core features (dashboard, requests, profile) work on mobile devices.
 - Navigation is usable on small screens.
 - As a *user* I want push notifications and gmail notifications for requests accepts (5pts)
 - Acceptance Criteria
 - Users receive a notification when their request is accepted.
 - Notifications can be delivered through push notifications
 - The notification contains some information about the accepted request.
 - As an *admin*, I want to view all requests to monitor system usage. (8pts)
 - Acceptance Criteria
 - Admin users can access a page showing all requests, even ones that have been finished and deleted.
 - The page displays request details (requester, points requested, location).
 - Admins can see the status of each request (pending, accepted, completed)
 - As a *user*, I want to be able to view a dark mode version of the webapp (1 point)
 - Acceptance Criteria
 - Users can enable dark mode with a button.
 - The interface changes to a dark color scheme.

- All pages remain readable and functional in dark mode.
- As a donor, I would like my QR code to have a spending limit, time limit, and for the ability to be pulled (5 points)
 - Acceptance Criteria
 - This feature is only available when a Get account is connected
 - There should be an input field for time limit
 - There should be an input field for the spending limit
 - There should be a button for pulling all requests
 - All updated inputs are visible under the GET user information
 - QR codes are auto pulled when the timer runs out, users balance gets to low, or user clicks pull qr code button.
